Career Objective

Results-driven Java Backend and Full Stack Developer with strong expertise in Java, Spring Boot, RESTful APIs, Microservices, JDBC, Hibernate, SQL, MySQL, PostgreSQL, and ReactJS. Experienced in designing scalable backend systems, implementing secure authentication, and optimizing database performance. Proficient in Data Structures, Algorithms, OOP, and MVC Architecture. Passionate about building high-performance applications and contributing as a Java Backend Developer or Software Developer Intern.

Technical Skills

Programming Languages: Java, SQL

Backend Technologies: Spring Boot, Spring MVC, REST API Development, Microservices, JDBC, Hibernate, JPA, Servlets

Frontend Technologies: ReactJS, HTML5, CSS3, JavaScript

Databases: MySQL, PostgreSQL

Core Concepts: OOP, Data Structures, Algorithms, DBMS, MVC Architecture, Exception Handling

Tools & Platforms: Git, Maven, Postman, IntelliJ IDEA

Concepts: Authentication, Authorization, CRUD Operations, API Integration, JSON Handling, Debugging & Testing

Projects

Expense Tracker Application — Spring Boot, ReactJS, MySQL

- Developed a full-stack web application enabling users to manage daily expenses with secure authentication and RESTful API-based CRUD operations.
- Designed normalized relational database schema improving query performance by 30% through SQL optimization.
- Implemented JWT-based authentication and role-based authorization to enhance application security.
- Integrated ReactJS frontend with Spring Boot backend using JSON-based REST APIs, reducing API response time by 25%.

Blood Bank Management System — JSP, Servlets, JDBC, MySQL

- Engineered a backend-driven blood inventory management system following MVC architecture principles.
- Implemented secure login authentication and session management, reducing unauthorized access risks.
- Optimized SQL queries and applied validation checks, preventing duplicate entries and improving data accuracy by 35%.
- Improved backend data processing efficiency by implementing structured exception handling and debugging techniques.

Internship Experience

Java Developer Intern — Cravita Technologies India Pvt Ltd — 2025

- Developed RESTful APIs using Spring Boot, enhancing backend module efficiency and scalability.
- Optimized SQL queries and improved database performance by 20%.
- Contributed to backend modules following Microservices and MVC architecture principles.
- Collaborated in debugging, testing, and API validation using Postman, ensuring high code quality.

Education

Bachelor of Engineering (Computer Engineering)

2022 – 2025

D. Y. Patil School of Engineering, Pune

CGPA: 7.93 / 10

Diploma in Information Technology

2019 – 2022

Government Polytechnic, Nanded

Percentage: 79%
